Stoma Care With A Soul

Living with a stoma can be challenging. At Dansac, we are dedicated to collaborating with our customers to develop stoma care products and services to make life better for people living with a stoma and those who care for them.

People are more than their stomas. They are real people with real lives, they face the challenges we all face, in addition to the challenges living with a stoma can bring. We recognise that it can't always be easy.

So it is our job to make sure we do everything we can to empower them, to give them confidence and to help them feel comfortable in their own skin.

We start by focusing on the needs of the whole person. Their stoma. Their skin. Their soul. Adjusting to life with a stoma is a holistic process and requires a lot of support.

It starts with our products. We design them to help keep skin naturally healthy. We know keeping the skin around the stoma healthy goes a long way in enhancing the quality of people's lives.

We make sure our skin-friendly products are easy to use. This not only helps our patients and caregivers, but also makes our products an easier choice for clinicians.

We help people overcome not only the physical aspects, but also the social and psychological repercussions of getting a stoma. Their lives have undergone a big change and it is important to us that they feel comfortable in their own skin.

Our dedication to stoma care, from stoma to skin to soul, is the foundation of our brand. It has brought us to where we are today and will lead us to new places in the future making living with a stoma a better experience for everyone.

TRE™ Technology

Dansac Product Portfolio

Designed to help keep skin naturally healthy and help patients to feel comfortable in their own skin

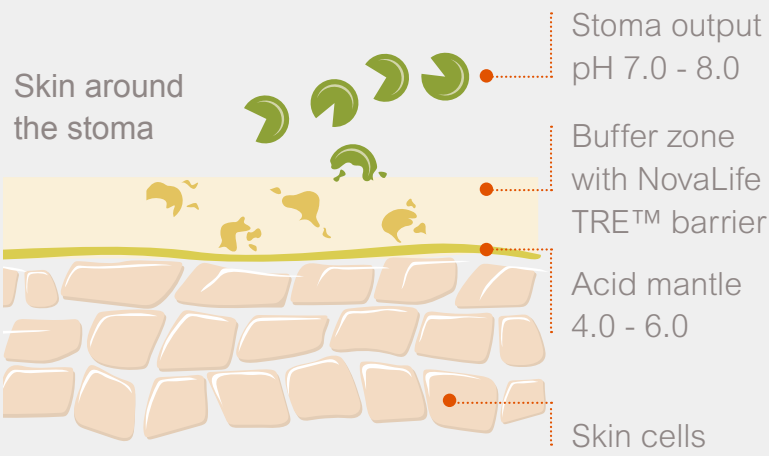

pH Balance

Skin is naturally acidic and has a pH of 4-6.

The pH balancing capabilities of the TRE™ skin barrier are designed to help protect the skin from stoma output, by maintaining the natural pH level of the skin.

Proactively managing pH level to help keep skin healthy

Absorption

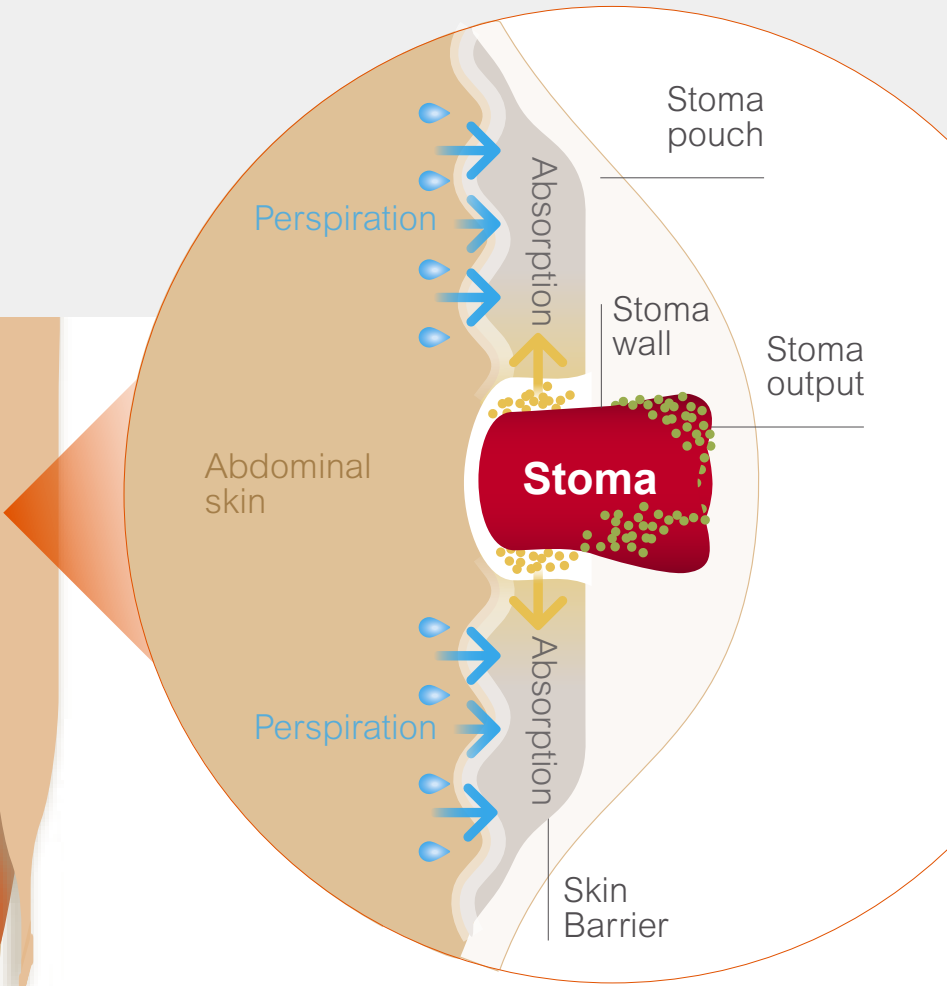

NovaLife TRE™ is a unique skin barrier that contains super absorbers that swell and expand when in contact with moisture, forming a secure seal to protect the skin.¹

The super absorbers in TRE™ technology are able to lock in a large amount of moisture to keep the skin under the barrier dry and healthy²

Adhesion

The adhesion capabilities of the TRE™ skin barrier are designed to provide a secure, flexible seal to help protect the skin from stoma output, while being easy to remove and gentle to skin.

Designed to have a high tack surface to provide secure adhesion and be flexible to allow for natural body movements

SMILEY CUT TAB

Re-designed for ease of use. Designed to make it easier to separate the tab from the release liner

TWO LAYER BARRIER DESIGN

Designed to prevent curling

THINNER DESIGN

Thinner design for flexibility. Only 0.7mm thick compared to our traditional 1.1mm hydrocolloid. The barrier tapers to 0.3mm, making the barrier lighter to wear

OVAL SHAPED DESIGN

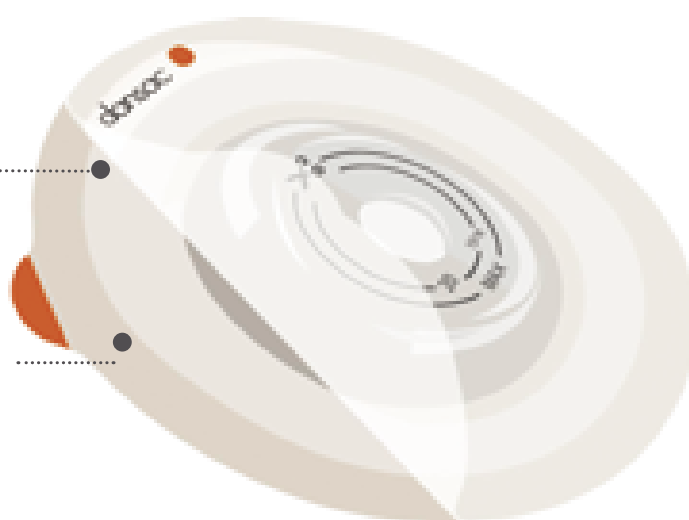

The oval shaped design moves with the body, keeping the barrier in close connection to the skin and help ensure that the adhesive area is positioned where you need it the most

PRIMARY LAYER

- High absorption close to the stoma where protection is needed the most

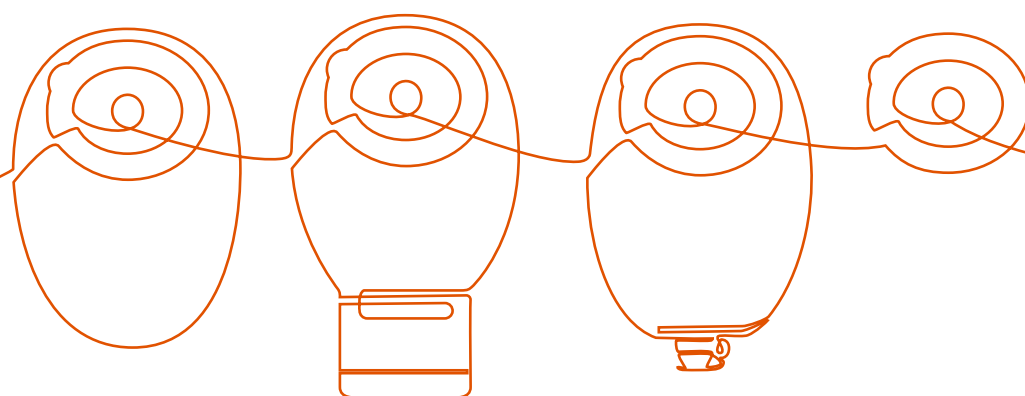

SECONDARY LAYER

- Utilises standard hydrocolloid technology and acts as moisture protection at the edge of the primary layer

Dansac TRE™ Technology

Offers three levels of protection that work together to keep skin naturally healthy.

Find out how you can help minimise skin complications for your patients with NovaLife TRE™ skin barriers - **visit www.dansac.co.uk**

Who are the Skin Health Alliance?

The **Skin Health Alliance** is a leading international skin health organisation working closely with dermatologists, scientists and the skin care industry with a common interest in the promotion of healthy skin. The **Skin Health Alliance** awards professional accreditation and endorsement to companies, services and brands seeking specialist independent dermatological recognition for their product research.

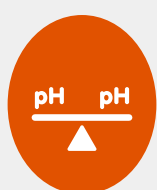

- **Dansac TRE™ technology** has received official dermatological accreditation from the Skin Health Alliance.
- In addition to the current rigorous safety testing our products go through, the SHA accreditation signifies that **Dansac TRE™ ostomy products** have been independently verified by a specialist panel.
- **Dansac TRE™ ostomy products** may help prevent skin problems and keep skin healthy from the beginning.
- By choosing **Dansac TRE™ technology**, people using stoma pouches can have the confidence and pride of knowing their barrier helps protect their skin, empowering them to live their life to the fullest.

The Skin Health Alliance's core mission, vision and values are to support skin health charities and good causes around the world.

NovaLife TRE™ ostomy barriers are designed to help you take care of your patients' peristomal skin health

pH balance

Designed to help protect the skin from digestive enzymes by maintaining the right pH level of the skin

Absorption

Helps absorb excess moisture to maintain skin's natural balance without losing internal and external strength

Adhesion

Designed to provide a secure, flexible seal to help protect the skin from stoma output while being easy to remove and gentle to the skin

For more information about **NovaLife TRE™** please visit www.dansac.co.uk

Characteristics of Convex Skin Barriers and Clinical Application

Results of an International Consensus Panel

McNichol, L, Cobb, T, Depaifve, Y, Quigley, M, Smitka, K & Gray, M 2021, 'Characteristics of Convex Skin Barriers and Clinical Application- Results of an International Consensus Panel'- *Journal Wound Ostomy Continence Nursing*, 48(6): 524-532.

Method: Consensus from 12 nurses with extensive experience in ostomy care

Results: Five convex skin barrier characteristics and 16 clinical application statements reached

Conclusion: Standard definitions to help clinicians select the right convex barrier based on assessment criteria for better patient outcomes

Want to know more about convexity?

Call your local Dansac specialist to book a **Convexity Pop-up Studio** for a hands-on experience to support the use of convexity and skin health for your patients.

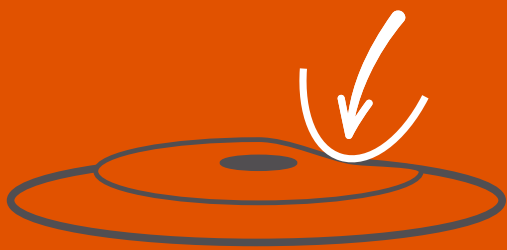

5 Characteristics of Convexity

Depth

The **depth** of the convex skin barrier is defined as the measurement from the apex of the dome to the base.

Compressibility

Compressibility is the capacity of the convex dome to be displaced or flattened.

Flexibility

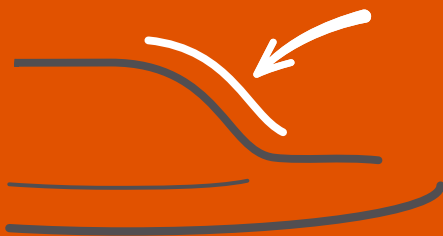

Flexibility is how easily the convex skin barrier can bend.

Tension Location

Tension location is the position in which the convex dome exerts downward and outward forces on the peristomal topography.

Slope

The **Slope** is the angle from the base of the convex skin barrier to the apex of the dome.

Three More Reasons to Feel Confident Using TRE™ Barriers

Our Largest Study to Date

Dansac undertook a multinational observational study, performed in 11 countries across Europe and the Asia-Pacific region. 440 clinicians provided feedback on their experiences before and after the use of Dansac TRE™ skin barrier. Working in partnership with 975 individuals with a stoma - this represents the largest end user study conducted on Dansac TRE™ skin barrier.

Patient Skin Health

Statistically significant improvement in peristomal skin health

Overall patients reported a reduction in average DET score³ of 1.8 points⁴ (p<0.001)

Patient Comfort

Statistically significant reduction in peristomal pain related discomfort

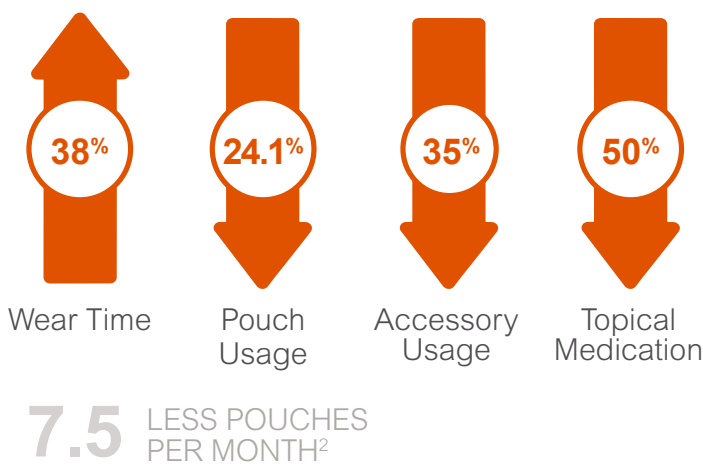

Overall patients reported a reduction in average peristomal skin pain scale by 1.8 points⁴ (p<0.001)

Patient Ease of Use

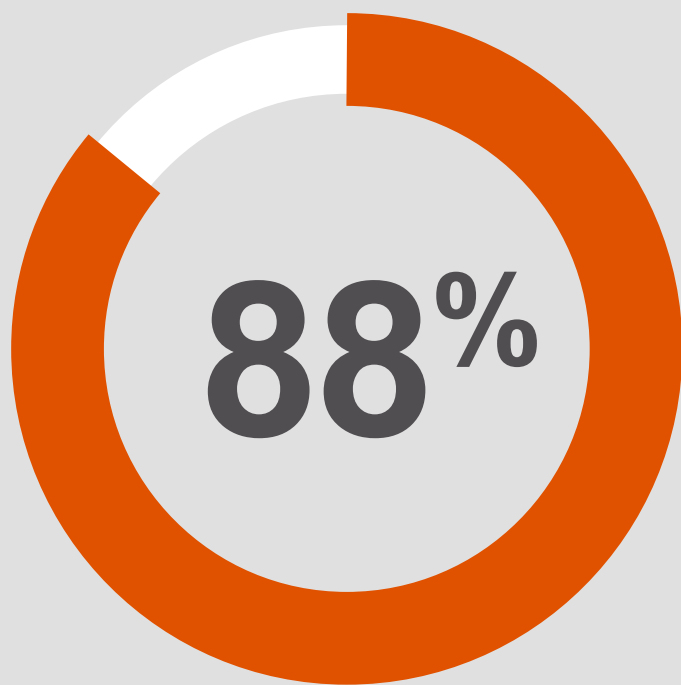

Statistically significant increase in wear time and a decrease in the need for accessories and topical medication⁴

Patients can benefit from a simplified care plan and a reduction in ostomy-related resources

NovaLife TRE™ skin barrier addresses the quality of life benefits for your patients beyond their clinical needs.

Impressive Performance

**In 88% of evaluations,
clinicians gave ‘positive satisfaction’**
on the overall performance of
NovaLife TRE™ barrier⁴

Improved Quality of Life

**Choose a barrier that focuses on
skin health to help improve your
patients health and well-being**

Skin health is so
much more than
just leakage and fit

Helen, Ostomy Hero

Why is skin health important to you and your patients?

Patient: Peristomal skin conditions may affect up to two-thirds of certain ostomy populations.⁵ It has been shown that “any visible disfigurement of the cutaneous surface can have a negative impact on body image”.

Clinician: Peristomal skin complications are estimated to account for 26% to 40% of all ostomy-related visits to a stoma specialist nurse.⁵

Dansac TRE™ technology offers 3 levels of protection to help keep your patient's skin healthy. Visit www.dansac.co.uk to find out more.

Absorbs. Swells.
Seals. Protects.

NovaLife TRE™ urostomy pouch

Take Away the Worry of Leakage Choose NovaLife TRE™ urostomy pouch

- NovaLife TRE™ skin barrier is a unique skin barrier that contains super absorbers that swell and expand when in contact with moisture, forming a secure seal to protect the skin¹
- The slim profile pouch design includes anti-bulge valve and discretion dots features which can greatly reduce pouch bulging⁶
- The EasiView™ viewing option provides discretion and allows observation of stoma and urine if needed.
- The improved tap of the NovaLife TRE™ urostomy pouch is adjustable and allows safe and controlled emptying of the pouch.

Dansac TRE™ Technology

Offers three levels of protection that work together to keep skin naturally healthy

3 levels of skin health protection

TRE™ technology is designed to help you act more proactively against peristomal skin complications

pH balance Designed to help protect the skin from stoma output by maintaining the normal pH level of the skin.

Absorption Helps absorb excess moisture to help maintain skin's natural balance, without losing internal and external strength.

Adhesion Designed to provide a secure, flexible seal to help protect the skin from stoma output while being easy to remove and gentle to the skin.

NovaLife TRE™ barriers are available in 1 piece and 2 piece
Flat • Soft Convex • Convex

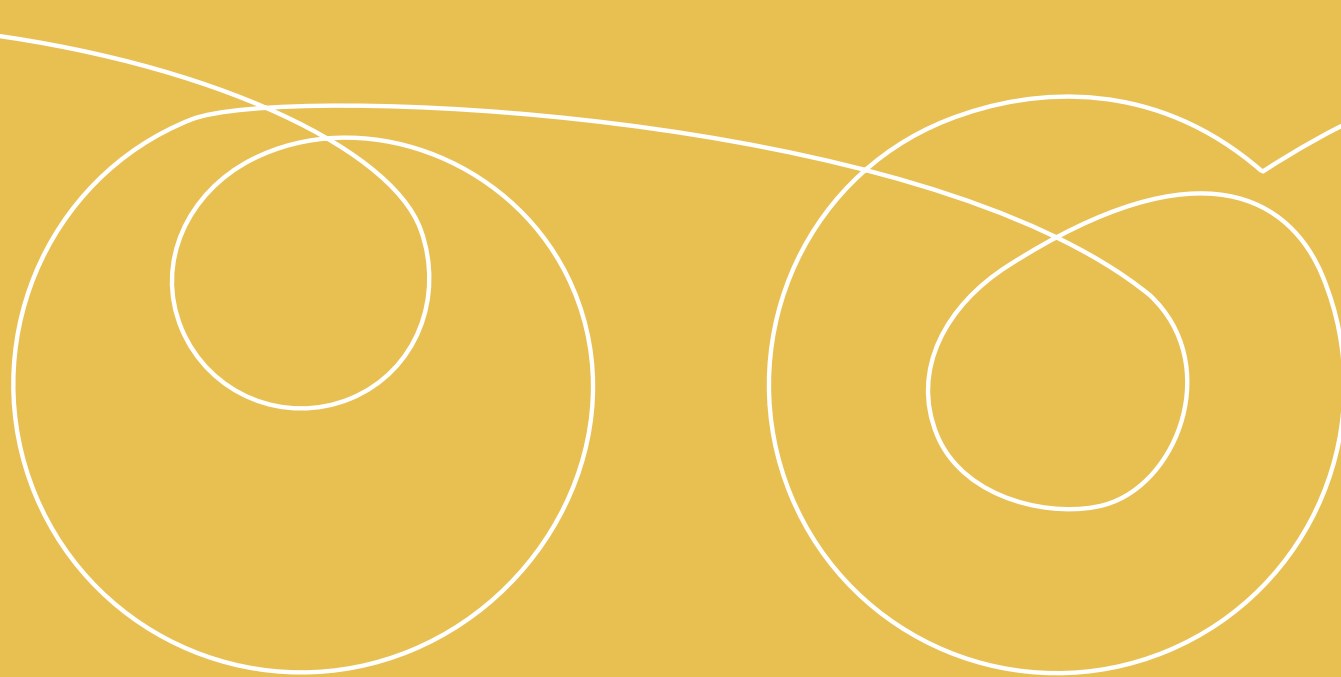

Find out how you can help minimise skin complications for your patients with NovaLife TRE™ skin barriers - **visit www.dansac.co.uk**

Meet Our Amazing Dansac Heroes

Hear from people who live with a stoma, how our products have helped them to live the way they want to, do what they love, and why they would recommend a NovaLife TRE™ product to other users.

Click on the play buttons and learn more about their individual journey.

Jim, Cancer Dynamo

“I think the biggest thing for me so far with this bag is the feeling that if I am going out somewhere I am not worrying about it leaking.

Great confidence I have in this, because of this design, it’s not going to leak on me, even doing strenuous workout in the garden or something like that.”

Helen, Ostomy Hero

“I believe that having a positive mind-set and practising self-care is so important for both physical and mental health. I keep myself fit and healthy by doing Pilates every day and I focus on the positives things in life rather than dwelling on the past – I don’t really think about my stoma at all now. To me every day is a blessing and I am indebted to my stoma and the new positive life it has given me.”

Hiren, Stoma Super Dad

“With NovaLife Dansac TRE™, fantastic, wow, I love the feel of it, it feels really light, really comfortable and it’s like a new skin, it doesn’t feel like you’ve got one on.

I would recommend this to any user out there looking to try a new pouch this is definitely the way forward.”

Secure StartSM

Stoma Support Service

The **Secure Start** service works in partnership with you in the hospital. We are a team of advisors who have been trained by nurses, and we specialise in answering any day to day, or routine questions your patients may have about stoma care. We work alongside you to offer your patients support and guidance with any stoma related query.

“Lovely people checking up on me, made me feel very cared for and so nice to have this sort of aftercare”
Patient

The **Secure Start** service provides support for patients who have recently undergone stoma forming surgery.

Welcome to Secure StartSM Services

All **Secure Start** registered patients can use this service, along with their relatives or carers (with permission). Confidential issues will only be discussed with the patient.

We are able to support your patients if they experience:

- Leakage
- Bag will not stay on
- Sore skin
- Change in length or size of stoma
- Stoma stops working
- Stoma becomes black
- Watery / loose output
- Feeling generally unwell, including nausea
